 - Mix & Match
 - Tiered discounts for groups of items.
 - Examples:
 - Buy 3 pairs of sunglasses from a group for \$5 off each, or buy 5 pairs for \$6 off each.
 - Buy 3 pairs of sunglasses from a group for 10% off each, or buy 5 pairs for 15% off each.
 - Campaign can have up to 10 discount tiers.
 - Discount can be dollar amount or percentage.
 - Can be applied to following groups (or combinations of groups):Categories, Tags, Suppliers, Items.
 - Quantity Discount
 - Tiered pricing for items.
 - Example:
 - Buy 3 t-shirts for \$50 or buy 5 t-shirts for \$65.
 - Campaign can have up to 10 discount tiers.
 - Discount can be dollar amount or percentage.
- **Self-Checkout Phase 2**
 - Admin mode timer configuration setting:
 - Self-checkout will pop a notification asking if an Admin user is still active after a specified period of time. At which point the system will log the user out if there is no response.
 - User check-in timer configuration setting:
 - Self-checkout will pop a notification asking if a customer user is still active after a specified period of time. At which point the system will cancel the existing transaction and reset for the next user, if there is no response.
- **OpSuiteSHOP Web Price**
 - Allows user to set a web price for an item and use that in place of the default location price.
