

## **Update Release Notes for version 5.54 - March 2022**

*Please be sure to install the updates when prompted. Your device must be online to receive the updates.*

### **New Features**

- **Self-Checkout Phase 2.**
  - Checkout screen will include taxes and discounts in the transaction details.
  - Ability to change/move the device location.
  - Ability to use a self-checkout device in landscape orientation.
  - Alert lamp is activated on the top of the K2 Mini Kiosk when HELP is activated by the user.
  - Customer inactivity timer:
    - Configured in OpSuite; will pop a notification asking if a customer is still active after a specified period of time. At which point the system will cancel the current transaction and reset for the next user, if there is no response.
  - Admin inactivity timer
    - Configured in Opsuite; pop a notification asking if an Admin user is still active after a specified period of time. At which point the system will log the user out if there is no response.
  - Manager options panel.
    - Manager can login and access additional options.
- **Implementation of Mix & Match campaign type.**
- **Implementation of Shift4 payment provider.**
- **Web transaction details will show up in transaction history.**
- **Canceled transactions will be logged as a “No Sale” in transaction history.**

### **Bug Fixes and Updates**

- Multiple fixes for Customer Quick-Add, including auto-fill issues.
- Resolved issue with partially fulfilling an order after the price or quantity has changed.
- Register Summary Report updated to show correct field amounts.
- Resolved multiple receipt issues.
- Resolved issue with manual returns not affecting purchase limits.
- Various campaign fixes.
