

Update Release Notes for version 5.50 - March 2021

Please be sure to clear the cache and cookies in your internet browser.

New Features

- **Finance**
 - Accounts Receivable (AR) now has the ability to apply a finance charge to the account after the billing cycle and grace period have ended.
 - Custom Stored Value Card account numbers can now be imported into OpSuite so they can be activated at the Point of Sale.
 - 3-Way Match: Purchase Order numbers have been added to the lookup screen
- **Inventory**
 - Departments and Categories can be updated in a Matrix Item. All individual items created under the matrix item will then be updated. NOTE: The individual item will no longer allow the department and/or category to be changed. The user will be advised that it must be updated through the main matrix item.
- **OpSuiteSHOP**
 - eCommerce: New optional webstore module with website builder and order management. Put your inventory online for your customers to shop 24 hours a day and from the comfort of their sofa or anywhere they might be.
 - BOPIS (Buy Online Pickup In Store): Customers can place an order online (requires the webstore module) and select in-store pickup.
 - Curbside Pickup: Customers can place an order online (requires the webstore module) and select curbside pickup.
 - Local Delivery: Customers can place an order online (requires the webstore module) and select local delivery.

Bug Fixes and Updates

- Promotions: When the "Apply Discount to Qualifying Items" checkbox is selected, the item list for rewards cannot be edited (it is the same as the qualifying items).
- Receivers: When there are multiple receivers for a single order, the pop-up message confirming the amount received will only show the amount received for the specific receiver you are in.
- Matrix Items: The Item Edit drop down in Matrix Items will only show fields that can be edited.
- Physical Inventory: Once a snapshot has been created in Physical Inventory, the Supplier, Category, Location and Item pickers are disabled so that no additional items can be added.
- Campaigns: Items imported into Campaigns for a Qualifier or Reward will immediately be available in the Qualifier or Reward Details.
